Inland Glass Company

Manufacturers
Illuminating Glassware

Catalogue No. 3

Chicago, Illinois

Foreword

N designing the various items of illuminating glassware illustrated in the following pages of our catalogue it has been our constant endeavor to produce something that would meet the demand for artistic and practical designs for commercial and residential lighting glassware. We believe we have succeeded in creating a line of glassware which will satisfy the most particular buyers; a line of glassware that will suit every requirement for commercial use and for home lighting, rich in artistic detail, and in keeping with the more advanced modes of interior decoration.

Considerable research in the laboratory, combined with an experience of many years in the practical manufacture of illuminating glass, has made possible the production of our various kinds of glass, which bear the characteristics of lines already accepted by the trade. No expense has been spared to present to the trade a quality of glass that will render the utmost in beauty and efficiency.

The founders of the Inland Glass Company, recognizing the necessity of a glass manufacturing plant in the heart of perhaps the greatest market for illuminating glass, have erected a large plant at Chicago to give to the trade a service and co-operation by close contact with the users of the product, which has heretofore been impossible. Our location and the service we offer should meet the hearty support of the trade in this section of the country.

Every known aid of science and invention has been brought forward, regardless of expense, to enable us to produce something beautiful and useful. We have equipped our plant with the most modern machinery; we have replaced, to a great extent, the old methods of hand manufacture with the more exacting and scientific automatic methods. We know that the benefit of this modern equipment, our location, together with our organization of artisans of skill and repute, will be felt and appreciated by the trade.

The Inland Glass Company

“INLAND INGLO WHITE GLASS”

A pure white opal glass of the finest texture, made by our own perfected process. An ideal glass for carrying decorations suited to the adornment of the home.

“INLAND SNOW WHITE GLASS”

A pure white glass which has been declared to be the most efficient light-density glass yet developed. It has a very low absorption of light rays, and is particularly adapted for use in commercial lighting installations, where the maximum efficiency of the lamp is demanded without glare.

“INLAND INLITE TRANSLUCENT GLASS”

A fine, semi-translucent glass, very white for glass of this character. Used in large Ball Globes for Street Lighting.

“INLAND IVORY”

A light cream colored glass where the color is a part of the glass itself. No color is applied on the outside. Provides a wonderful soft clear light for all parts of the home.

“INLAND CRYSTAL”

A carefully selected clear crystal glass of wonderful brilliancy. One of our finest products.

DINING ROOM GLASSWARE

With Parchment Effect

7026D17

7028D17

7026D18

7028D18

Special attention is called to the items here illustrated. This is a new creation in dining room lighting glassware. The bowl is **entirely** enclosed, made of crystal glass, with the top portion enameled and hand decorated in parchment effect, as shown. The bottom portion is roughed and tinted, eliminating all glare and allowing the passage of light to flood the table, and at the same time soften the light that is thrown on the walls and ceiling, to harmonize with the decoration of the room.

Snow-White Glass

Made of "Inland Snow-White" glass—the most efficient light-density white glass yet developed. Our exclusive formula and improved methods of manufacture make this glassware the best for use in commercial lighting installations where the maximum efficiency of the lamp is demanded with the absorption percentage of light rays reduced to the minimum.

As a diffusing medium for the modern high-intensity lamps now in use, this glass is without an equal, and the usual glare is entirely eliminated. When unlighted the fine, soft white texture of this glass is a beautiful addition to the appearance of any commercial establishment.
